

## Seamlessly Manage the Complexities of Travel

Travel has changed permanently, and compliance with new and ever-changing rules on the documents needed for travel falls on airlines. Failure to do so can lead to an increase in non-compliance and greater passenger handling costs.

### Navigating the new regulations for passenger check and track

Covid Testing

Forms and Declarations

Vaccination Requirements

Quarantine Info

### INFORM – COLLECT – GO

Underpinned by the TravelDoc platform, Ready To Go from ICTS Europe Systems integrates with the leading health wallet providers and Airline systems to clear passengers quickly and correctly.

**INFORM**

Enable passengers to prepare for their journey

**COLLECT**

Collect and automatically process copies of passengers documentation

**GO**

Quicker and easier passenger handling at the airport

### Enhance the passenger's travel experience

Ready To Go enables airlines to verify that passengers have the correct travel documents before they leave home to provide a fast and seamless process from home to gate.

#### Improved customer service

- Passengers are better informed and well prepared for their journey.
- Give passengers the confidence they need to travel.

#### Quicker passenger handling

- Process by exception, focus only on the problems.
- Maintain OTP targets.

#### Gain passenger insights

- Know about passenger state before airport arrival.
- Better planning of resources and manpower.

#### Save significant manpower costs

- Large return on investment.
- Provide mitigation against fines.

### Powerful rules engine

Ready to Go has integrated with TravelDoc, a powerful rules engine with a high level of customisation for airlines. Travel rules can be customised at country, route and airport level based on all data parameters.

### Easy to implement

Ready To Go's responsive site works on all devices from desktop to mobile. It is an aggregation of all wallet providers, which maximises the scope of use easily.

No separate integrations are required. It provides an effective standalone add-on or configurable modular platform that seamlessly integrates with:

- Touchless Passenger Solutions**
- Smart Airport Environments**
- Airline Systems**

More than 20 health wallets and national certificates can be verified.
