PASSBOARD

A cloud based passenger handling solution designed for use by Airline agents at the Airport to reduce the number of manual checks required and protect Airlines from fines due to inaccurate passenger documentation.

Integrates with all leading Airline systems to clear all passport, health, test, vaccine, passenger locator forms and other regulatory requirements.

**ⓘ 80%** of passengers now require a manual check at the Airport.

SIMPLIFIED PASSENGER HANDLING
Reduce the number of manual checks required, streamline processes and improve the passenger experience.

FASTER VERIFICATION AND BOARDING
Streamline passenger verification processes and reduce manpower costs

RAPIDLY DEPLOYABLE AND EASY TO USE TECHNOLOGY
Integrates with leading airline systems, available on a diversity of devices, provides accurate passenger data for airline operation agents.

HIGH RETURN ON INVESTMENT
Protect returns through reducing fines, lower passenger handling costs and higher passenger satisfaction levels

ACTIVE POWERFUL RULES ENGINE
Automates the clearance of all passenger travel requirements against latest requirements regardless of destination.

SEAMLESS INTEGRATION WITH AIRLINE SYSTEMS
Solves data quality issues by verifying and updating the passengers' information in the Departure Control Systems (DCS)

PLUG AND PLAY SOLUTION
Leverages the advantages of the cloud and automation, and without the need for costly development or additional on-site infrastructure.

ALL IN ONE HEALTH CHECK
Verify the latest worldwide tests, vaccines and national certificates
